Our experts have over

**twenty** years of experience

**Product Catalog**

Over 5,000 products from over 60 of the industry's leading manufacturers

## PARTNER WITH US!

### Wholesale Pricing & Financing

Take advantage of aggressive wholesale pricing and make use of our credit terms to ensure care-free order fulfillment.

### Marketing & Education

Find the marketing materials you need to learn VoIP at your own pace, explain complex concepts to your customers, or compare VoIP products side by side within seconds! Feel free to share our materials with your customers!

### Dedicated Sales & Support

We have over 15 customer-facing sales, support, and service associates to take care of your needs both before and after the sale. VoIP Supply prides itself in delivering world-class Customer Support to ensure your business has the best possible experience.

### Full-Cycle Logistics

Eliminate the need & expense of warehousing by leveraging VoIP Supply's same-day blind shipping capabilities and professional RMA services.

## We Are Ready to Help!

### Response Times: We are FAST!

- Tech support average of 14 minutes
- Sales response average of 9.3 minutes
- 99.9% of orders ship the same day

### 7 VoIP Experts

- 70 years of combined experience

# What Is SkyAMP?

- **New, game-changing, and patented technology**
- **Unpowered Wireless Signal Booster**
- **Models available in DECT, 2.4 GHz WiFi, Bluetooth, and 4G Cellular**
- **No cables, wires, SIM cards, configuration, pairing or setup required**
- **Just Set It and Get It!**

**SkyAMP devices are constructed from a mix of metallic materials and assembled under our patented process so that they function similarly to solid-state electronics, harnessing the power of physics, radio waves, and inherent qualities of the materials to make for an effective signal booster.**

# Key Differences

## What sets SkyAMP apart?

- **Unpowered** - SkyAMP devices require no electricity or batteries
- **Just Set it and Get it** - No configuration, pairing, or setup process
- **Range** - SkyAMP devices have a significantly larger coverage area than competing products
- **Fast** - SkyAMP cleans the signal, removing noise and interference, resulting in faster data speeds
- **Secure** - The SkyAMP devices have no firmware and are not hackable
- **Tough** - All products are tested to be durable, survive drops, and harsh environmental conditions

# Usage Scenarios

## What can SkyAMP solve?

- Concrete structures (i.e. parking facilities, bunkers, basements and sub-levels).
- Rural and remote locations outside cell range (most towers only broadcast up to 22 miles)
- Dead spots
- Slow or weak signals
- “High bar count”, but no service
- Congested areas, large events
- Traveling with spotty signals
- High rises, typically above the 6th floor the signal decays
- Manufacturing and warehouse facilities with high conflict materials (i.e. lots of metal)

# Performance

## What to Expect

### WiFi

Range extension of 300', improved upload and download speeds for all devices within range. **Faster connection to WiFi access point and internal network.** Significant reduction in packet loss. Boost in signal strength (15-30 dBm)

### Bluetooth

Range extension to 300', dramatically improved connection speeds, device switching and overall range is typically tripled.

### Cellular

Dramatically improved connection speeds, significant reduction in packet loss, boost in signal strength (15-30 dBm)

### DECT

Clearer calls, larger range (typically 300' from SkyAMP), faster system interactions.

# Line Up

## Personal

20 Foot Range  
4G

- Small or Rural Job Sites
- Students
- Vehicles
- Camping & Recreation

## Mag

600 Foot Range  
WiFi and Bluetooth
